

### REMARKS/ARGUMENTS

The allowance of claims 4-12 and 14-19 is noted with appreciation.

Claims 1-3, 13 and 20-24 have each been rejected over one or more of Albrecht, Hwang and the acknowledged prior art.

Claims 1 and 20 have been amended to include features from claims 2, 3 and 13, and disclosed in paragraph [0032] and other parts of the specification. Method claim 24 has been amended similarly. Claims 2, 3 and 13 are being canceled and new claims 25 and 26 are being added.

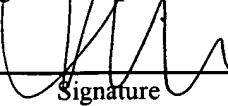

More particularly, claims 1, 20 and 24 now recite a feedback arrangement and other features that enable a power converter to supply constant power to a load. Among these features is circuitry and a method step for controlling on-time of a switch.

Neither Albrecht nor Hwang nor the admitted prior art discloses the features now claimed in claims 1, 20 and 24. Therefore, allowance of claims 1, 4-12 and 14-26 is now requested.
